

AC[®] SUMMIT

White Milling Oat

King Of The Hill

Well known for its short stature, AC[®] Summit has stood up against the competition. A white milling oat with proven yields, good harvestability, and medium maturity makes for an easy harvest and has been a proven standard for millers.

Parentage: AC[®] Ronald/OT299

Highlights

- Up to 108%* of CDC Dancer
- Short stature, good lodging resistance
- Excellent disease package
- I for multi-gene crown rust, stem rust and barley yellow dwarf disease
- Good standability, easy to harvest
- Mid maturing
- Desired milling qualities; high beta glucan, high test weights and low hull percentage
