

KWS RECEPTOR

All Around Performer

In farming consistent performance is everything.

With the latest 2022 technology, KWS Receptor is a variety that you can trust. It has shown top-in-class winter hardiness. This resulted in KWS Receptor achieving consistent, top yields year after year in Western Canada Registration Trials. Combined with good ergot protection from PollenPlus™ technology, excellent falling numbers and very short straw, KWS Receptor will be the top choice for rye growers.

Agronomy & Quality Data

	KWS RECEPTOR	Average of Hybrid Varieties	Average of Traditional Varieties
Yield	100%	96%*	72%*
Winter Survival %	90	88	89
Height cm	84	86	100
Lodging 1-9	2.8	2.3	3.5
Test Weight kg/hL	74	74	74
Protein %	10.5	10.5	11.6
Falling Number seconds	313	318	232
Ergot %	0.9	0.8	0.9

Main Feature

Market leading yields:
4% over hybrid rye checks*
38% over traditional rye*

Variety highlights:

- Top-in-class winter hardiness
- Short straw, excellent harvestability
